Hello.

We are Insullite, a well established family run manufacturing business who specialise in the the complete transformation of your conservatory. We do this by creating beautiful solutions designed to help you fall in love with your conservatory.

At Insullite we are the manufacturer of the Insullite Warm Roof System, a tiled conservatory roof which has been designed to help you get the most out of your conservatory. Our tiled conservatory roof system has excellent thermal properties creating a beautiful room you can enjoy all year round. We are also proud to present our latest innovation, the Iconic Garden Room, a retrofit conservatory upgrade made up of structurally insulated pillars, new A-rated frames and glazing, all topped of with a beautiful Insullite Warm Roof. This strong an robust structure is a fast and cost effective alternative to a new extension and will add real value to your home.

Its a well known fact that conservatories are freezing cold in winter and boiling hot in summer, there are only a couple of months a year when you can enjoy your conservatory. This is due to the fact that many existing conservatory roofs are made using glass or polycarbonate, these materials are thermally inefficient.

The Insullite solid tiled conservatory roof has been intelligently designed to solve all of the common problems conservatory owners face, we do this by using a multi-layered insulation system. Our system uses a SuperQuilt 19 layer multi foil insulation which has excellent thermal value as it deflects the hot and cold temperatures away from the conservatory. We also employ a sound deadening insulation which unlike rigid insulation completely silences the weather. This intelligent use of insulation technologies means that the Insullite tiled conservatory roof achieves a u-value of 0.18, meaning the Insullite system is one of the best performing on the market.

The Insullite roof system's structure is robust and designed to stand the test of time. The structure has been developed to put minimum stress on the existing conservatory frames, we do this by employing a system which transfers load back to the house structure where the foundations will be stronger. The Insullite tiled conservatory roof uses a timber structural system because unlike aluminium it doesn't conduct hot or cold meaning that there is no risk of condensation inside the conservatory roof. The Insullite tiled solid roof system is fully ventilated beneath the tiles making it 100% condensation free.

“investing in the Insullite Warm Roof System will add real value to your home”

Q: Do I need planning permission?

A: If the conservatory is less than 30m², has an external quality door and separate heating and electric supply then you do not require a formal planning application.

Q: Does my conservatory require Building Control Approval?

A: Conservatories are exempt from building control but at Insullite we have secured Building Control Approval for our tiled conservatory roof system to give you extra peace of mind.

Multi-Layered Insulation

The solid conservatory roof replacement from Insullite has been intelligently designed to achieve a market leading U-value of 0.18 this rating has been validated by industry professionals. We have achieved this excellent U-value by employing a multiple layered insulation system using industry leading materials.

We use SuperQuilt insulation, SuperQuilt Consists of 19 Layers and works by reflecting radiant heat back into your home and through summer reflecting excessive heat out. Like a mirror reflects light, SuperQuilt reflects heat. So if you pay to heat your home, why let that heat escape? Keep it in your house. We also use a layer of 120mm internal insulation because as well as having excellent thermal properties it also has fantastic acoustic properties virtually silencing external sound within the conservatory. The Insullite tiled conservatory roof uses an intelligent blend of breathable membrane and ventilation to ensure that our system is the only 100% condensation free tiled conservatory roof on the market, giving you extra peace of mind that your home is in safe hands with Insullite.

cosy and **warm** in **winter**
comfortable and **cool** in **summer**

The **Insullite Warm Roof System** has an amazing **0.18 U-Value**

What is a U-Value?

A U-Value is a measure of heat loss. It is expressed in W/m²K, and shows the amount of heat lost in watts per square meter of material when the temperature outside is at least 1% lower. The lower the U-Value, the better the insulation provided by the material

When explaining **U-Value**
Less is Better

The solution is simple
Lower U-Value = Lower Bills

iconic GARDEN ROOMS

We are proud to introduce the latest product innovation from Insullite. The Iconic Garden Room is a fast and cost effective extension system designed to be installed in the place of your existing conservatory frames.

Have you been thinking about having a new extension built, but don't want the disruption and mess? The Iconic Garden Room could be the perfect solution for you if you have a conservatory that requires upgrading.

The Iconic Garden Room is a retrofit system installed onto your existing conservatory walls creating a beautiful real extension. The system consists of a series of fully insulated structural columns, A-rated frames and glazing topped off with a double insulated solid tiled conservatory roof. The garden room is then professionally plastered on the inside, turning the conservatory into a stunning room you and your family can enjoy all year round.

Our Garden Rooms are prefabricated in our workshop by a team of professional joiners, this enables us to speed up the on site time. This means an Iconic Garden Room is usually completed within seven days of us arriving on site to remove the existing conservatory. Our professional installers will ensure that all work carried out is finished to a high standard and will remove all waste from the site.

the perfect solution for your home”

The Ultimate Room

At Insullite we believe in providing an excellent quality service with everything we do. This is why the Iconic Garden Room is hand made to the highest standard by a team of professionals in our Lancashire workshop. The Iconic columns are constructed from structural timber and are extremely strong, they're double insulated for both thermal performance and sound proofing providing a fantastic U-Value of 0.18.

The Iconic columns are clad with high quality durable plastic and are available in a huge choice of colours with a smooth or wood grain texture.

The Iconic Garden Room is designed to accommodate the Insullite Warm Roof System, a beautiful tiled conservatory roof system with excellent thermal properties. The Insullite Tiled Conservatory Roof is 100% bespoke giving you the opportunity to accurately match your existing house roof or make a statement with a contrasting design, for full details of the options available please see pages 12 & 13.

Your Choice

The Insullite Tiled Conservatory Roof System is extremely versatile with a wide range of options available. We offer a fantastic choice of roof cover options to match many common types of roof cover found on homes in the UK.

We offer the **Tapco Slate**, a durable plastic roof tile with the effect of a classic slate roof. Tapco Slate is available in a wide range of colours and has a 50 year guarantee against cracking, fading and curling so if you choose this option you will have a stunning looking roof for many years to come.

We also offer the **Decra Roofing System**, a coated metal tile designed to match all other types of traditional roofing, the Decra tiles have a 40 year guarantee and have secured by design accreditation, making them the only roofing system approved by the Police. Decra tiles are available in a range of styles and colours.
